Projects

EmpowerPro, *Employee Management System*

06/2024 – present

- EmPowerPro is a web-based employee management system designed to address the fragmented approach in HR and management tools within the IT industry. It effectively integrates key functionalities such as payment slip management, leave management, complaint management, job vacancy management, attendance management, and project management.
- Technologies - React,Spring boot,Bootstrap,PostgreSql

Gomez, *Hospital Management System*

08/2023 – present

- This project addresses the challenges encountered by both patients and staff, with the goal of developing an IT solution that enhances Gomez's efficiency and effectiveness in performing their duties. By recognizing and analyzing these difficulties, we aim to design a system that streamlines and optimizes processes.
- Technologies- PHP,PhpMyAdmin,JavaScript,HTML,CSS,MySql
